## **DETAILED ACTION**

### ***Response to Arguments***

Applicant's arguments, see Remarks, filed 5 July 2007, with respect to the rejection(s) of claim(s) 1, 5, 7, 9-11, 15, 17, 19, and 20 under 35 USC 103 have been fully considered and are persuasive. Therefore, the rejection has been withdrawn. However, upon further consideration, a new ground(s) of rejection is made in view of Niki. The finality of the previous Office Action is rescinded and the present Office Action is made Non-Final.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1, 2, 7, 10-12, 17, and 20 are rejected under 35 U.S.C. 102(b) as being anticipated by Niki.

As per claims 1 and 11, Niki discloses a thermostat abnormal state detecting apparatus for an engine cooling fluid based on detected temperature TW, predicted temperature CTW, and driving condition VPSAVE, wherein abnormal state testing is conducted when detected cooling water temperature TW is within a predetermined range (failure region (paragraph 0080, line 8)) on the basis of the detected temperature and a predicted cooling water temperature CTW, a

radiator fans driven (see control sequence described in paragraph 0080 and illustrated in Figure 10B).

As per claims 2 and 12, Niki teaches the basic control sequence in paragraph 0080 as already discussed above. It is further noted that abnormal state detecting is a form of precision detection since it tests how well the thermostat is functioning.

As per claims 7 and 17, Niki discloses checking the abnormal state after the fan has been driven for an intermittent manner (paragraph 0080, lines 19-21).

As per claims 10 and 20, Niki discloses the fan being a radiator fan (paragraph 0080, line 19).

#### ***Allowable Subject Matter***

Claims 3-6, 8, 9, 13-16, 18, and 19 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
